We provide cloud base ERP software which is developed on PHP and MySQL.

It can be accessed anywhere through internet 24x7(twenty four hours).

Anyone can use with little training.

It will be accessed through mobile and tablets.

Our ERP software provides personal login Id for students, teachers and parents to access on web portal and mobile app anytime and anywhere.

Patents can check their child's progress from anywhere.

The management will get one click reporting and easy access to previous year data in each module.

The management will be able to ensure that how many students have installed or uninstalled the app on their mobile.

The management will be able to control how long users can have access to their login id by setting limits on it.

There are several modules in our ERP software.

In academic Information we provide:

Front-desk management like visitors and gate pass,

Enquiry and sale of admission form,

Scholar register maintenance,

Full student's information,

Character certificate,

T.C management,
